Virtual Meeting/Conference Recording Notice

The American Institutes for Research® (AIR®) allows for the recording of audio, visuals, participants, and other information sent, verbalized, or utilized during business-related meetings. By joining a meeting, you automatically consent to such recordings. Any participant who prefers to participate via audio only should disable their video camera so only their audio will be captured. Video and/or audio recordings of any AIR session shall not be transmitted to an external third party without the permission of AIR.

In addition, AIR does not permit participation in AIR meetings through the use of AI bots such as Otter.ai or other AI platforms to record or transcribe conversations for AIR meetings, webinars, or virtual events in lieu of in-person attendance, unless requested as a reasonable accommodation. Any participants who attempt to use AI software for meeting participation will be denied admission, or their session will be terminated once it becomes apparent such software is in use.

Wikimedia DC

Wikimedia DC is the regional outreach organization for Wikipedia and the other projects of the Wikimedia Foundation. Our mission is to promote participation in Wikimedia projects in Washington, DC; Maryland, Virginia, West Virginia, Delaware, and throughout the United States.

Wikipedia

What exactly is it, anyway???

What is Wikipedia?

Wikipedia is a multilingual, web-based, free encyclopedia based on a model of openly editable content. It is the largest and most popular general reference work on the internet. Wikipedia is supported by the Wikimedia Foundation, a non-profit organization which operates on money it receives from donors. (From English Wikipedia)

Wikipedia contains articles that include information about notable subjects or topics. There are currently more than 8 million articles in English Wikipedia.

Wikimedia is the global community of contributors to Wikimedia Foundation projects. The movement was created around Wikipedia's community and has since expanded to the other Wikimedia projects.

- Wikipedia, a web-based encyclopedia
- Wiktionary, a dictionary
- Wikibooks, educational textbooks
- Wikinews, news articles
- Wikiquote, a collection of quotations
- Wikisource, a library of source texts and documents
- Wikiversity, educational material
- Wikivoyage, a travel guide
- Wikispecies, a taxonomic catalogue of species
- **Wikimedia Commons, a data repository of media like images, videos, and sounds**
- **Wikidata, a common source of data, also accessible by the other projects**

Wikipedia: Basics, Policies, and Oversight

WIKIPEDIA
The Free Encyclopedia

What's a Wiki?

- A website where anyone can edit
- Edits meant to be “quick”
- Remembers all versions (nothing ever destroyed)
- Hyperlinks between pages

Image: Lois Curtis, the plaintiff in the Olmstead v. L.C. Supreme Court case, (center) presents President Barack Obama w/ a photo
Source: Wikimedia Commons, CCO - Work of the US government

Wikipedia: Five Pillars

- Wikipedia is an encyclopedia.
- Wikipedia is written from a neutral point of view.
- Wikipedia is free content that anyone can use, edit, and distribute.
- Wikipedia's editors should treat each other with respect and civility.
- Wikipedia has no firm rules.

For more, search Wikipedia for

WP:Pillars

Wikipedia Policies

- **Neutral Point of View** - should be written so all sides can agree (WP:POV)
- **Notability** - significant independent sources -> importance (WP:N)
- **Verifiability** - using reliable sources to reference information (WP:V)
- **No original research** - point to existing scholarship (WP: NOR)
- **Assume good faith** - start with congenial spirit (WP:GF)
- **Conflicts of interest** - disclose and abide by terms of service (WP:COI)

Wikipedia: Reliable Sources

Articles should be based on reliable, published sources. If no reliable sources can be found on a topic, an article should not exist. **WP:RS**

Reliable sources per WP guidelines

- Published scholarship (print or online)
- News organizations
- Vendor and e-commerce sources. Should only be used to verify awards won, album length, etc.
- Biased or opinionated sources, but only when trying to report the existence of one side of a topic, debate, etc.

Unreliable sources per WP guidelines

- Questionable sources, i.e., those with a poor reputations or no editorial oversight
- Self-published sources including websites, i.e. the website of the company or person you are writing about*
- Primary sources*
- Social media sites including LinkedIn

* Sites like these can be added to articles' external links sections.

Citing Oneself

- Subject-matter experts who are published in reliable sources may cite themselves
- Experts should:
 - do so only where appropriate.
 - avoid overuse - this may result in accusations of spamming.
 - not put undue weight on their own work.
 - avoid promotional tone or intent.

Plagiarism

DO NOT copy and paste exact text from a source and add it to a Wikipedia article even if citing the original source.

Instead, rewrite the information in your own words and cite your sources properly.

Conflicts of Interest

Do not edit or create articles about:

- Yourself
- Your school
- Colleagues
- Your employer
- An employee
- Close relatives or friends

Image: [WWII flagger](#) via Wikimedia Commons (CC 2.0). Uploaded by User: File Upload Bot (Magnus Manske). Author: Oregon Department of Transportation

Article Deletion Process

Articles for deletion (AfD) - Nomination process that generates a discussion page. Users vote 'Keep' or 'Delete'. Comments are encouraged. An admin will close as a 'Keep' or 'Delete' after seven days.

Speedy deletion - Process where articles are nominated for deletion without discussion. Anyone can nominate, but only admins can delete.

Proposed deletion (PROD) - An intermediate process developed for articles that do not meet the criteria for speedy deletion but for which a full discussion is likely unnecessary. Articles are deleted after seven days if there are no objections.

All are initiated by adding templates to the articles in question.

Full article: [Deletion of articles on Wikipedia](#)

Wikipedia's Content Gaps

WIKIPEDIA
The Free Encyclopedia

The “Average” Wikipedian

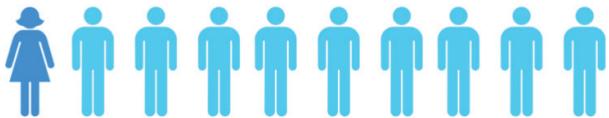

The common characteristics of average Wikipedians inevitably color the content of Wikipedia. The average Wikipedian on the English language Wikipedia is:

1. white
2. male
3. technically inclined
4. formally educated
5. an English speaker (native or non-native)
6. aged 15–49
7. from a majority-Christian country
8. from a developed nation
9. from the Northern Hemisphere
10. likely employed as a white-collar worker or enrolled as a student rather than being employed as a blue-collar worker

Gender Gap – Editors

Only
1 out of
10 Wikipedia editors
is female!

More recent estimates are 12%–15%

*Average from 2008–2011

Gender Gap – Content

Percentage of women's biographies – English Wikipedia:

November 2014	July 2024
15%	19.86%
	399,180 out of 2,010,116 biographies

Disability Content Gaps

What we know and don't know

- No major Wikimedia projects or organizations are tracking disability-related gaps (like Women in Red does for gender).
- **Wikiproject: Disability** exists but has few action items and somewhat inactive editors.
- Edit-a-thons and content drives do take place regularly but are not part of larger initiatives.
- The percentage of disability-related articles may be harder to determine as there are more subcategories and research is ongoing.
- Some gaps, like a lack of photos in Wikimedia Commons, can be more easily identified.

Disability Content Gaps

Why they may persist (if they exist)

- Wikipedia, as a tertiary source, is a direct reflection of available secondary sources.
- A Wikipedia article cannot be created if secondary sources are not available to prove notability.
- Paywalls make some sources inaccessible.
- Those who wish to write about disability-related content require the skills and knowledge needed to create and improve Wikipedia.

Disability Content Gaps

No data? Now what?

Even without these data, we:

- operate under the assumption that gaps exist, especially as the disability studies and rehabilitation research field continue to grow.
- continue planning events, like themed edit-a-thons or workshops, to train scholars and others to create and edit articles.
- highlight this work to attract more of the same.
- encourage scholars to publish and make secondary source as accessible as possible so that Wikipedia (a tertiary source) can be improved.

A **mobility aid** is a device that helps individuals with mobility impairments to walk or improve their overall mobility.^[1]

These aids range from walking aids, which assist those with limited walking capabilities, to wheelchairs and mobility scooters, which are used for severe disabilities or longer distances that would typically be covered on foot. For individuals who are blind or visually impaired, white canes and guide dogs have been long-standing resources. Additional aids are designed to facilitate mobility and transfers within buildings, including navigating between different floor levels.

The term "mobility aid" traditionally refers to technology mechanical devices and is commonly used in government documents such as documents related to tax concessions.^[2] It refers to devices that provide a level of mobility comparable to unaided walking or standing from a seated position.

Advancements in technology are likely to expand the functionalities of these devices through the integration of sensors and the provision of audio or tactile feedback.^{[3][4]}

Walking aids [edit | edit source]

Walking aids are devices designed to assist individuals with mobility impairments in maintaining upright ambulation. These aids include [assistive canes](#), [crutches](#), [walkers](#), and more specialized devices such as gait trainers, and upright walkers. Each type of aid is designed to support users in different ways, which include improving stability, reducing lower-limb loading, and facilitating movement.

Improving Stability

Walking aids enhance stability by providing additional points of contact, which expand the user's

Walking aids

What are devices designed to help people walk? Examples include canes, crutches, and wheelchairs.

How do they work?

What are the benefits?

References

Walker cane hybrid [edit | edit source]

A walker cane hybrid^[6] was introduced in 2012 designed to bridge the gap between a cane and a walker. The hybrid has two legs which provide lateral (side-to-side) support which a cane does not. It can be used with one or both hands in front of the user, similar to a walker, and provides an increased level of support compared to a cane. It can be adjusted for use with either one or two hands, at the front and at the side, as well as a standard cane. The hybrid is not designed to replace a walker which normally has four legs and provides support using both hands.

A girl using a pair of underarm / axillary crutches

The image shows a person's legs and feet. They are wearing white shorts and black socks. They are using two crutches with blue and grey straps around their upper arms (axillary crutches). Their left foot is forward, and they appear to be walking.

Paragraph

Gait trainers

Another device to assist walking that has entered the market in recent years is the [gait trainer](#). This is a mobility aid that is more supportive than the standard walker. It typically offers support that assists weight-bearing and balance. The accessories or product parts that attach to the product frame provide unweighting support and postural alignment to enable walking practice.

Seated walking scooter

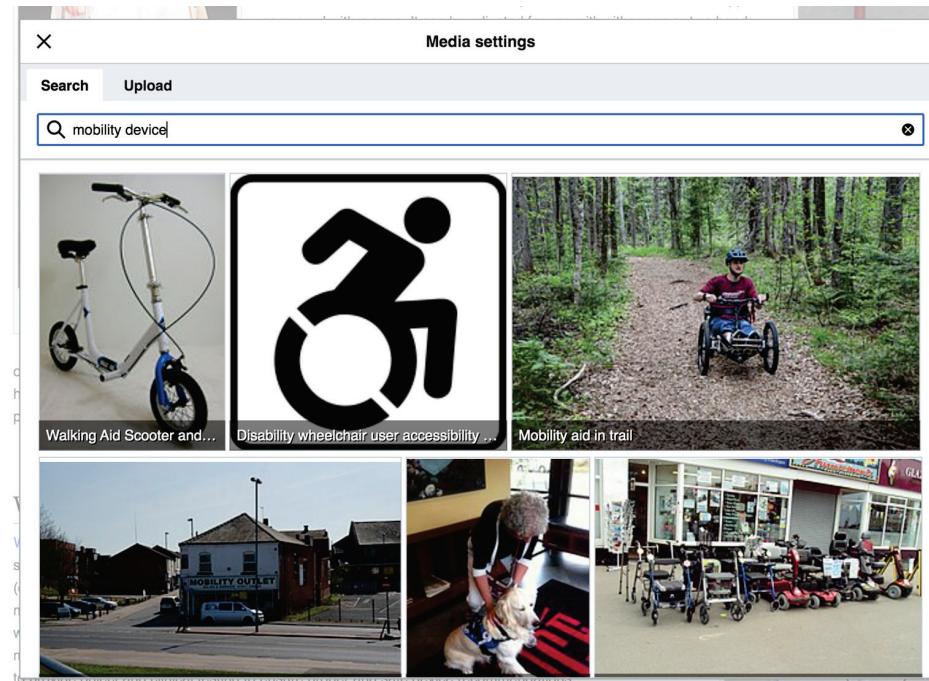

The [Walk Aid Scooter](#) allows a user with normal balance and foot, knee or hip conditions to unload the lower extremities. The two-wheeled scooter has a bicycle-type seat and handlebars, and is manually propelled with one or both feet like a [balance bicycle](#). This walking aid scooter provides more support than a cane and is lighter, less bulky and easier to propel than a wheelchair!

Creating New Articles

WIKIPEDIA
The Free Encyclopedia

Method 1: Creating Article Drafts

1. Open Wikipedia and log in.
2. Enter “Draft: Article name” into the WP search bar. If it doesn’t exist, you will be presented with a red link.
3. Select the red link to open a blank page.
4. Add a references header at the bottom.
5. Return to the top and add text, sources, hyperlinks, etc.
6. Publish when ready.

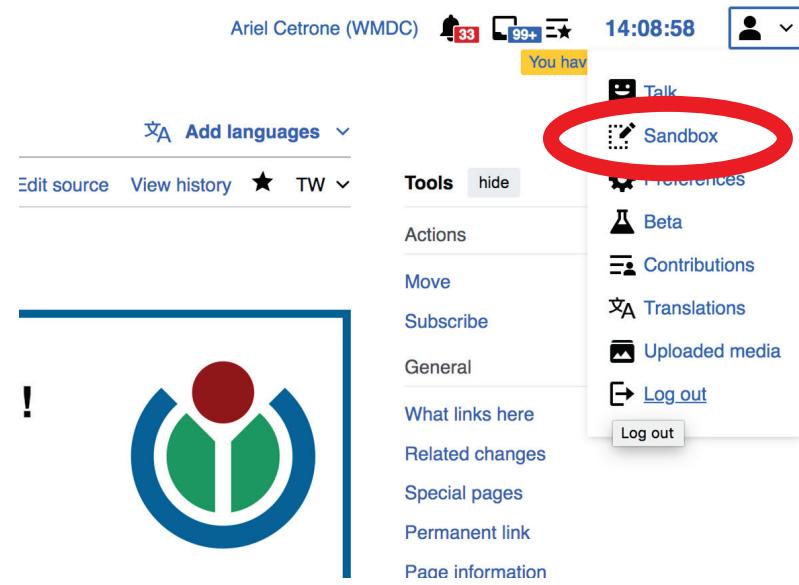

The screenshot shows the Wikipedia search results for the query "Draft:Sample article". The search bar at the top contains "Draft:Sample article". Below the search bar, there is a link labeled "Search for pages containing Draft:Sample article". The main content area is titled "Search results" and shows a single result: "Draft:Sample article". The result page states that the page does not exist and provides instructions to create it or check search results. It also includes navigation links for previous and next 20 pages, and links to view 20, 50, 100, 250, and 500 pages.

Drafts can be moved into mainspace once new editors have published 10 edits or have had a username for 4 days. Articles can also be created directly in Wikipedia mainspace by entering the article name in the WP search bar without “Draft:” and by following steps 3–5. This is not recommended for new or inexperienced editors.

Method 2: Creating Sandbox Articles

1. Select the “person” icon on the top right.
2. Select “Sandbox.”
3. Add a references header at the bottom.
4. Return to the top and add text and sources.
5. Publish when ready.

Articles in a sandbox can be moved into mainspace once new editors have published 10 edits or have had a username for 4 days.

Moving Draft or Sandbox Articles

- When the draft or sandbox page is ready for Wikipedia mainspace, go to the draft article or Sandbox page and select “Move.”

Draft:Sappington Village [edit | edit source] Add languages ▾

Draft Talk Read Edit Edit source View history ★ TW ▾

From Wikipedia, the free encyclopedia

ORES predicted quality: 🌟 Stable (1.49)

Sappington Village was an unincorporated village located in what is now Odenton in Anne Arundel County, Maryland. The village was a community of farmers, including brothers Thomas and John Sappington and their families, who settled in the area in the mid-19th century.^[1] It continued to appear on maps and train time tables as late as the 1930s. Sappington had a post office as well as a one-room elementary school, the Sappington School, which was established for black children. The only remaining non-residential structure from the village is the Macedonia United Methodist Church.^[1]

5b. If not your own work, name the source and select the appropriate Creative Commons license or another reason it is license free or in the public domain (e.g., pre-1928, published for the U.S. government).

This site requires you to provide copyright information for this work, to make sure everyone can legally reuse it.

- This file is my own work.
 This file is not my own work.

Source

Where this digital file came from — could be a URL, or a book or publication.

Author(s)

The name of the person who took the photo, or painted the picture, drew the drawing, etc.

Now tell us why you are sure you have the right to publish this work:

- ▼ **The copyright holder published this work with the right Creative Commons license**

Not all Creative Commons licenses are good for this site. Make sure the copyright holder used one of these licenses.

If the work is already published online, but not under that license online, or if you aren't the copyright holder of the work, please follow the steps described at [COM:OTRS](#) (the copyright holder has to send an email with relevant permission) and add {{subst:OP}} to the "Source" field above.

- Creative Commons Attribution ShareAlike 4.0 ([legal code](#))  
 Creative Commons Attribution ShareAlike 3.0 ([legal code](#))  

Adding Images or Files (cont'd)

6. Describe the image.

Image title

Create a unique descriptive title using plain language with spaces. Omit the file extension, if any.

Angler's Footbridge C&O Canal Potomac, Maryland

Remove

Caption

Add a one-line explanation of what this file represents, including only the most relevant information. *Optional*

English

Angler's Footbridge C&O Canal Potomac, Maryland

[+ Add a caption in another language](#)

Description

Provide all information that will help others understand what this file represents.

Adding Images or Files (cont'd)

7. Add metadata (optional); e.g., footbridge.
8. Publish.
